

Jam partner

***** PLEASE READ CAREFULLY - VERY IMPORTANT !!! *****

1.

Jam partner doesn't need to be installed. So, if you would like to use Jam partner as STICKWARE, please install it into the root directory of your USB-stick (or into C:\ ...) and then execute ...\\RMCA\\jamp.exe.

2.

Setup will NOT modify your configuration, but only creates 1 folder (...\\RMCA) and 2 subfolders. If you would like to remove the application from your system, simply delete the program folder (...\\RMCA) and its subfolders. That's all.

3.

The software package comes with only 35 demo-styles. Although the author does NOT sell any styles and does NOT take a guarantee for this that styles in the Internet or somewhere else are available, you should go online and visit <http://www.styles.xdigits.com>. You should find altogether more than 850 x 2 ready-to-use high-quality styles for free download. However note: these styles can only be processed with a registered version of Jam partner.

The DEMO version has in general all features of the registered version except for the saving capabilities and the fact that only the about 35 supplied demo styles can be (time-limited) processed. The registered version saves styles either as *.rcs files (Jam partner's own style format) or as *.mid files (MIDI files), NOT as e.g. *.psr or *.sty files (YAMAHA's style formats). Jam partner recognizes the following chord types (Base: C): C, C-m, C-7, C-m7, C-dim, C-sus4, C-9, C-5b, C-M7, C-aug, C-6, C-mM7, C-m6, C-m9, C-m5b, C-aug7, C-sus7.

4.

Want a personal license key and additional registration instructions immediately? The registration fee is US\$ 34.00. The online ordering process is automated and secure. Within minutes - (as soon as your credit card payment was approved) - you will receive two e-mails ...

- * details about your payment and an invoice for your accounting
- * your license code and additional registration instructions
